

CAGE

ABSTRACT

The cryptocurrency and decentralized finance landscape has burgeoned with a lot of meme tokens over the past few months, some with a few use cases and some created just for the meme of it. Most of these tokens tend to be a joke as they are basically created to be, beginning with their aims and visions. DogeCoin, a cryptocurrency started as a joke, has gained a lot of traction since one of the richest men in the world, Elon Musk, started tweeting and talking about it, hence helping it gain more publicity. Doge, Shiba Inu and other new meme tokens have gained a lot of traction and most of them have even recorded higher ROIs than most DeFi blue chips. Meme tokens are currently the trend but what if we can have a meme token with more use cases and not just one to create a pump and dump like we mostly see in this space. What if we can have one meme token that can be used to govern a Meme Token Index consisting of carefully selected meme tokens to stand with big brother Doge and to bring about high economic productivity to holders? That's why we are launching C4G3, a new decentralized finance meme token evolution. C4G3 is a decentralized ERC-20 token that will be used to govern the C4G3 ecosystem starting with the flagship Meme Token Index (CMI). Imagine having the opportunity to hold one meme token that represents and governs the Meme Token Index protocol that consists of top meme tokens including the governance token. This provides a huge opportunity for investors interested in the meme ecosystem to utilize their resources to the maximum, be it time and money needed in chasing independent returns of meme tokens. Mostly, a lot of time and expertise are required in searching for the next Dogecoin or Shiba Inu, that's why C4G3 is being created to make investing in the meme ecosystem easier.

BACKGROUND

Dogecoin was created in 2013 as a way to satirize the hype surrounding cryptocurrencies and as a sarcastic meme. During the 2017 cryptocurrency bubble, Dogecoin recorded one of the biggest gains during the run. This meme coin has over the years gathered a strong community around it and in 2019, the community voted Elon Musk as the CEO which he also accepted. In 2020, Elon Musk began to talk more about Dogecoin and it wouldn't end there, he went on the SNL show to still talk about it. This kind of recognition resulted in other meme coins getting launched, you can talk about the likes of Shiba Inu, FEG, Akita etc which have all outperformed a lot of coins. The C4G3 team also believe that one of the best marketing tools is using memes; few words speak a lot with memes. We can build real solid products with a meme(s) at the core. The cryptocurrency space is maturing and evolving with time. While most projects are doing their part to help the space, we also believe we can create and increase economic activities with the launch of CAGE MEME INDEX.

VISION

With the exponential growth we have witnessed in the world of meme tokens, it has become quite difficult to keep track, hence most investors are missing out on massive gains and the benefits that come with it. Our mission is to get one token to represent all the top meme tokens with the vision of creating one token to govern a digital asset index designed to track the performances of top meme tokens to provide an even platform for growth and for all holders of these tokens to benefit not only from price performance but also rewards that come with combining top meme tokens under one umbrella. For one to be able to capture some of the high gains that have been produced recently by most of the top meme tokens, a lot of investment must be made; not only with money but also time and a bit of technical know-how. CAGE intends to simplify these into its token mechanism by using smart contracts to create a Meme Index Token that will index the top meme coins and capture some of their independent gains for the C4G3 community and holders.

PRODUCTS

Cage Meme Index (CMI): This will be the first use case or product of the CAGE ecosystem. C4G3 is the governance token that will be used to govern the CMI protocol. The Meme Index(CMI) is a digital asset or token designed to track the performance of five tokens; four top meme tokens and a stablecoin. Our Meme token, C4G3, brings together top meme tokens into the CMI to generate a lot of benefits for C4G3 holders by tracking performance of top meme tokens in the Cryptocurrency and Decentralized finance ecosystem. CMI will track meme token projects that have good long-term goals and show a commitment to ongoing maintenance and development. C4G3 holders are owners of the protocol.

CAGE Meme Token Index Suite (CMI):

C4G3
DOGECOIN
SHIBA INU
DOGELON
USDC

Users can acquire CMI token by one of the following:

Purchasing directly on different available exchanges like Uniswap etc.
(By manually depositing the underlying assets to receive MMI token either by using the single or multi-asset option.

The Meme Index is governed by C4G3 token. Basically, C4G3 token holders will be able to create and vote on proposals in the community. C4G3 aims to be the Meme token around which most memes revolve to generate high economic productivity for the ecosystem.

METHODOLOGY

TOKEN INCLUSION CRITERIA & METHODOLOGY

For the initial stages, CMI - the Meme Index Token will track 4 meme tokens and a stablecoin that meet majority of the following criteria:

- Available on the Ethereum blockchain.
- Has a verified token supply.
- The token is a meme, having one or more use cases is advantageous.
- Has a vibrant and supportive community.
- Easily tradable and has reasonable and sufficient liquidity on Ethereum and across various trading platforms.
- The token must not have a minting feature or other similar features that can be disadvantageous to passive holders.
- The project must not be insolvent.
- The token must have been launched and trading in the last 120 days.
- Must have been listed on CMC and Coingecko.

GOVERNANCE

CAG3 is a community owned project and after sometime the team will be implementing a governance system to give complete control of whatever has been built to the community. In the initial stages, the team will be in control of key sectors of the project, especially development, till a time when the team will relinquish control on the project into the hands of the community. The team will keep doing deep research into the best governance process that can steer the project forward and keep it in good hands. Many DeFi platforms like Uniswap, Yearn, Compound among others have made decentralization a guiding priority and we intend to follow in those footsteps. We want to see a future where CAG3 finally becomes a community-owned and run project with all proposals made and decisions voted on or taken solely by the community. We believe this is achievable and it's one of our top priorities.

TOKENOMICS

C4G3 stands quite apart and goes against the grain of typical meme tokens. It has a fixed supply and no transaction tax, C4G3 is not deflationary. The transaction taxes on most recent coins have been outrageous and even though C4G3 aspires to stand together with selected top meme tokens, the C4G3 token by design doesn't follow the current and common trend. C4G3 is the utility and governance token for a Meme Index protocol that is an equally-weighted index token of top and tradable meme tokens. C4G3 is at the core of the ecosystem. The token plays an important role in the ecosystem and inarguably among top meme tokens.

C4G3 TOKEN INFO

Name: CAGE
Type: ERC-20
Ticker: C4G3
Decimal: 18
Total Supply: 100,000,000.

CMI TOKEN INFO

Name: Cage Meme Token Index
Type: ERC-20
Ticker: CMI
Decimal: 18
Total Supply: #300,000
Index Pool Liquidity: TBD
Initial Exchange
Liquidity: 100,000

C4G3 TOKENOMICS

Seed: **40,000,000.**
Public: **30,000,000**
Liquidity: **12,000,000**
Team & Development:
18,000,000.

SALE INFO

Seed: **\$60,000**
Allocation: **40M**
Price: **\$0.001**
Public Sale: **\$90,000**
Allocation: **30M**
Price: **\$0.003**
Total C4G3 Sale: **70M**
Total Raise: **\$150,000**

FUNDS ALLOCATIONS

C4G3 Initial Liquidity: **\$54,000**
Developments: **\$24,000**
C4G3 Initial Liquidity: **\$32,000**
CMI Listing: **\$40,000**
C4G3 Listing Price: **\$0.0045**
CMI Listing Price: **\$1**

INITIAL MC OF C4G3 (assuming all tokens will be in circulation) \$450,000.

CONCLUSION

Over the past few months, the price performance of meme tokens have outshone a lot of coins and most ordinary investors and newbies who were lucky to get into these coins made more gains than most people who followed some blue chips with use cases. There's been a lot of success stories this year in which some new investors with little to no knowledge in cryptocurrency investing made a lot of gains just by jumping into some of these tokens. Most of them are created as pumps and dumps and late investors find themselves stuck with worthless coins. In a cryptocurrency world full of uncertainties, it is difficult to keep track of new tokens in order to capitalize on their massive gains and this is where Cag3 comes in with its MMI. MMI is an index of meme tokens that seeks to capitalize on the massive upside potential of top meme tokens to bring higher economic rewards to investors and holders. Meme tokens are not going away, they are here to stay and we are here to stay with them.

ROADMAP

PHASE I: LAUNCH

- Official announcement of C4G3 launch.
- Release of CAG3 Manual (Whitepaper).
- Initial fund raise
- Website launch.
- C4G3 Contract Audit.
- C4G3 Contract deployment.

PHASE II: SALE

- Private Sale.
- Uniswap listing.
- Sale distribution.
- Marketing (This will be recurring).
- Coingecko & CMC Listing.

PHASE III: INDEX

- CMI Index dashboard.
- CMI Contract Deployment.
- CMI Contract Audit.
- CMI Index Pool Deployment.
- CMI Index Pool Contract Audit.
- CMI ILO on Uniswap.
- Coingecko & CMC listing.

PHASE IV: STAKING

- Launch of Staking Dashboard.
- Deployment of Staking Contract.
- Staking Contract Audit.
- Launching of CAG3 MASTERS (NFT).

PHASE V: GOVERNANCE

- Governance.
- Ecosystem Development.
- Website revamp.

FAQs

What is C4GE?

C4G3 is the meme spelling for the word CAGE which simply refers to confining things in an enclosed area. In our own definition, C4G3 is used to represent the combining of top assets to generate high economic rewards.

What is C4G3 token?

C4G3 token is a decentralized ERC-20 utility token that governs the C4G3 ecosystem and plays a major role in the C4G3 Meme Index.

What is the maximum supply of C4G3 token?

The maximum of C4G3 token is 1 trillion

What is C4G3 Meme Index (CMI)?

This is the name of the index pool that tracks the performance of assets.

What is C4G3 Meme Index Token (CMI)?

CMI is a ERC-20 token that represents the C4G3 Meme Index. CMI can be traded and also be minted until the maximum cap is reached.

What is the maximum supply of CMI?

The maximum supply of CMI token designed by the team is 500,000.

How many tokens does this ecosystem have?

There are 2 different tokens. One is C4G3 token which is the utility and governance token and the other one is the C4G3 Index token which tracks the performance of the asset in the pool. The CMI will be backed by the tokens it tracks, that is to say, CMI can only come into circulation by being minted by one or multiple of the assets it tracks. No new CMI can ever be minted after the maximum cap is reached.

Why should I buy C4G3 and CMI?

C4G3 can be used to govern the platform, participate in any future events and CMI gives holders exposure to the index pool.

What are the current tokens that make up the C4G3 Meme Index?

C4G3 token
DOGECOIN
SHIBA INU
DOGELON
USDC

How do I buy C4G3 tokens?

You can purchase on Uniswap or other exchanges.

How do I get CMI?

Before the maximum supply is reached, you can get CMI in two ways:

- 1 – By minting with the single-asset pool or multiple asset pool
- 2 – By buying on an exchange
After the maximum cap is reached, you can only get it with option 2.
